

PATIENT

EVERY MAN WITH PROSTATE
CANCER NEEDS TO KNOW
HIS BRCA STATUS

BRACAnalysisCDx[®]

The only FDA-approved blood test
to help you know your advanced
cancer treatment options.

Easy and affordable genetic testing to learn your BRCA status to determine what treatment is right for you.

- Your BRCA status could determine your eligibility for advanced cancer treatments
- Only FDA-approved germline BRCA1/2 test
- Affordable testing covered by majority of health plans

Patients with a personal diagnosis of any of the following cancers should consider genetic testing:

Prostate
Cancer

Ovarian
Cancer

Pancreatic
Cancer

Breast
Cancer

BRACAnalysis CDx[®] Overview

A one size fits all approach in the treatment of cancer may result in patients being over or under treated. If you or a loved one have been diagnosed with prostate, metastatic breast, ovarian, or metastatic pancreatic cancer, BRACAnalysis CDx identifies if you have a unique BRCA1/2 mutation. Knowing your BRCA status is essential when deciding what treatments are best for you.

What is BRCA?

Everyone is born with BRCA genes. Normally, *BRCA1* and *BRCA2* genes prevent cells from developing into cancer. When one of these genes becomes ineffective due to an inherited mutation, the cell has a hard time preventing tumors from growing, causing an increased risk of developing cancer.

Advanced Cancer Treatments and BRCA

Cancer cells with a germline *BRCA1/2* mutation are more vulnerable to treatments that directly or indirectly damage DNA. If you carry a BRCA mutation, your cancer cells are less likely to be repaired and will eventually die with the help of advanced cancer treatments like PARP inhibitor therapy.

Cost Should Never be a Barrier to Testing

That's why it's our promise to make it accessible and affordable. Through insurance and financial assistance:

97%

Insurers have coverage for hereditary cancer testing

75%

Patients pay \$0 for testing at Myriad¹

≥90%

Patients have or will qualify for a payment of \$100 or less¹

¹Internal data on file at Myriad Genetics, Inc.

Process for Testing

With a simple blood test, Myriad can let you and your physician know if you are a candidate for advanced cancer treatment.

Your physician takes a blood draw

Your sample is sent to Myriad Genetics

Your physician will receive your results and will inform you if you are eligible for advanced cancer treatments

Your Next Steps For Testing

Advanced cancer treatment like targeted therapies are new forms of treatments. Ask your doctor about getting BRCA testing to guide your treatment options.
